

**Be an icy artist**

Light up the long wintery nights

## You will need

Two small, empty plastic tubs (they should be different sizes)

Cold water

Pebbles or stones

A freezer

A candle

1. Half-fill the larger tub with water
2. Put some pebbles into the smaller tub and place it in the larger one. The smaller tub should float without touching the bottom of the bigger one.
3. Put the tubs in your freezer.
4. When the water is frozen solid, carefully remove the ice from the tubs. It should look a bit like a candle holder.
5. Put a candle into your lantern and light up your garden!

*Cool!*

## Ice lanterns

Try using different sized containers, or add glitter and food colouring to the water.
